

Seletar Airport Emergency Service Unit

SELETAR AIRPORT EMERGENCY SERVICE (AES) WINS BEST UNIT AWARD

The annual AES Best Unit competition was introduced in 2009 to recognise AES units which have excelled in areas of operational readiness and competency. The units are assessed based on a rigorous and comprehensive evaluation which includes the individual's physical and operations competency, and the station's overall operations competency.

Competing with six other AES units in Singapore, Seletar AES outshined the rest and clinched the FY2016/2017 Best Unit Award. Worthy of special mention is the stellar performance of AES Seletar in the physical competency segment, with at least 98% of the Airport Emergency Officers (AEOs) attaining Individual Physical Proficiency Test (IPPT) passes and above, with 51% achieving the IPPT

Gold Award! In addition, 56% of the AES Seletar AEOs were awarded with the Full Attendance Award – a strong showing of AES Seletar's commitment to their call of duty.

On top of ensuring day to day airport fire safety, AES Seletar firefighters undergo rigorous training in order to maintain their physical and operations competency for aircraft firefighting operations. Aircraft firefighting and rescue drills are also regularly conducted to ensure emergency preparedness of our firefighters.

Seletar AES Best Unit Award 2017 would not have been possible without the dedication and commitment of Seletar AES unit and the support and encouragement from the Seletar Airport community.

JOIN US AT THIS YEAR'S EXERCISE BEAR ON 16 NOVEMBER 2017

The annual Seletar Airport aircraft firefighting and rescue exercise, Exercise Bear, will be conducted on 16 November 2017 at Seletar Airport. To find out more or to take part in the exercise, please contact Senior Airport Emergency Officer Joshua Ch'ng at joshua.chng@changiairport.com

Best Operator Award

In addition to the Best Unit Award, FSGT Ong Kim Seng from AES Seletar was also conferred the Best Operator Award for outstanding performance in operating the foam tender among 34 other participants from the AES Division. He completed the driving obstacle course with fire extinguishment in a whopping timing of 1 min 35 sec. ▲

Safety Outreach Series

To reinforce safety awareness at Seletar Airport, Changi Airport Group (CAG) introduced a series of safety outreach programmes which targets the airport community at Seletar Airport.

SAFETY OUTREACH 1

Sharing of Learning Points from Past Aircraft Incidents

The first of the series targets ground operations crew and focuses mainly on sharing of learning points from past aircraft incidents. The outreach activities include conducting role-playing sessions to demonstrate the importance of communication, organising one-to-one sharing sessions with ground operations staff and outreach sessions at GSPs' facilities, and question and answer sessions.

SAFETY OUTREACH 2

Towards Zero Runway Incursions at Seletar Airport

The second outreach programme is targeted at airside contractors who work in the vicinity of the manoeuvring areas at Seletar Airport. As most of these contractors are foreign workers, the programme is designed to be simple, concise and interactive.

Airside contractors participate actively in question and answer sessions using simple placards

SAFETY OUTREACH 3

Safety Exchange Time

The Safety Exchange Time programme targets ground operational personnel and is aimed at reinforcing learning points from past aircraft incidents at Seletar Airport. Participants had to answer questions relating to past incidents at Seletar Airport. In exchange, they were given a token from Seletar Airport. ▲

A participant receives a token for answering questions correctly

SUPPORTING OUR AIRPORT COMMUNITY'S SAFETY JOURNEY

CAG has also been actively participating in Seletar Airport community's safety journey in various ways.

24 March 2017

Shell Aviation Oil Spill Response & Safety Workshop

At Shell's Oil Spill Response & Safety Workshop, CAG conducted a sharing session on past safety incidents to the participants.

29 March 2017

Singapore Youth Flying Club (SYFC) Safety Day

A booth was set up by CAG at the SYFC Safety Day to remind instructors and student pilots of the mandatory conditions for entry into the runway.

Reaching out to student pilots at SYFC

August 2017

Hawker Pacific Safety Month

During Hawker Pacific's safety month, CAG organised a segment to share with Hawker Pacific staff on past safety incidents.

Sharing by CAG on past safety incidents

OUR SELETAR AIRPORT GOLD AWARD WINNERS

Awardees (L-R): Mr Mohammad Salleh Bin Abdul Mutalib and Mr Tay Beng Kit from ST Aerospace

In recognition of their courageous acts, Mr. Mohammad Salleh Bin Abdul Mutalib and Mr. Tay Beng Kit from ST Aerospace were presented the Gold Team Award by CAG Chief Executive Officer, Mr. Lee Seow Hiang at the Annual Airport Safety Awards 2017.

On 8 December 2016, Mohammad Salleh and Beng Kit were performing an aircraft towing operation in Seletar Airport when they noticed that the landing gear and tyres of another aircraft had caught fire. They responded to the situation immediately with fire extinguishers and successfully put out the fire.

The duo shared that they felt it was only right for them to provide assistance to others in trouble and that their training in the usage of fire extinguisher had been put to good use. Their courageous and quick action prevented the escalation of the fire.

Congratulations and a big Thank You to Mohammad Salleh and Beng Kit for helping to keeping our airport safe! ▲

Breitling DC-3 makes stop at Seletar Airport

On 3 April 2017, Seletar Airport welcomed the legendary Breitling DC-3 which made a stop in Singapore as part of its world tour.

The 77 year-old twin engine, propeller-driven DC-3 was initially flown as a commercial airline under American Airlines. It was used by the American military forces between 1942 and 1944 and returned to commercial aviation subsequently. Today, there are fewer than 150 DC-3 aircraft in flightworthy condition worldwide, including the Breitling DC-3.

Breitling aims to break the world record as the oldest aircraft to circumnavigate the globe. The aircraft's world tour journey began in Geneva on 9 March 2017 and ended at the Breitling Sion Airshow 2017 in September 2017. ▲

The Breitling DC-3 was welcomed with a water cannon salute when it arrived in Singapore, making it the first aircraft to be given this honour at Seletar Airport

A LASTING PARTNERSHIP: CELEBRATING 80 YEARS OF SHELL AVIATION IN SINGAPORE

WINNER SHELL AVIATION '800TH-FLIGHT GIVEAWAY' AT SELETAR AIRPORT

800TH JET A1 REFUELLING AT SELETAR AIRPORT*

Date: March 10, 2017

80th
YEARS SHELL AVIATION
IN SINGAPORE
1937-2017

*For the year 2017

This year is an important one for Shell Aviation. It marks its 80th anniversary of servicing Singapore's aviation industry with high quality products, services and safety standards at its two key locations – Seletar Airport and Changi Airport – the world's sixth busiest international airport.

Shell is a valued partner at both airports, providing essential, end-to-end integrated refueling services to its customers. As an industry leader in aviation fuel

supply chain management, Shell offers extensive experience in operating fuel facilities in numerous airports worldwide, bringing global best practices to Seletar Airport, which brings to its customers assurance in product quality, excellence in service delivery, and continuous improvement through innovations.

To commemorate its 80th anniversary, Shell Aviation initiated its "800th Flight Giveaway"

scheme at Seletar Airport. For every 800th customer flight refueled with Jet A1 or Avgas, the pilot and supporting ground crew receive a prize from Shell, along with a team photograph souvenir.

Since establishing its presence at Seletar Airport, Shell has contributed to more than just refueling operations. The company places a lot of emphasis on safety – Shell, in collaboration with CAG, conducts regular seminars on fuel handling, safety and oil spill response, in addition to the bi-annual safety day event hosted at the airport.

Richard Pereira, Shell Aviation General Manager for Asia Pacific and Middle East says, "We are excited to continue on our growth journey with Seletar Airport – we look forward to strengthening our ties with the Seletar Airport community and working closely with them towards making Seletar Airport the premier aviation hub in the region." ▲
